Office Action Summary	Examiner	Art Unit
	Thomas H. Parsons	1745
The MAILING DATE of this communication ap	ppears on the cover sheet with th	e correspondence address
Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPI WHICHEVER IS LONGER, FROM THE MAILING I - Extensions of time may be available under the provisions of 37 CFR 1 after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period - Failure to reply within the set or extended period for reply will, by statu Any reply received by the Office later than three months after the maili earned patent term adjustment. See 37 CFR 1.704(b).	DATE OF THIS COMMUNICAT .136(a). In no event, however, may a reply b d will apply and will expire SIX (6) MONTHS f te, cause the application to become ABANDO	ION. ie timely filed from the mailing date of this communication. DNED (35 U.S.C. § 133).
Status		
1) Responsive to communication(s) filed on 09.	July 2003.	
· —	is action is non-final.	
3) Since this application is in condition for allowed	ance except for formal matters,	prosecution as to the merits is
closed in accordance with the practice under	Ex parte Quayle, 1935 C.D. 11	, 453 O.G. 213.
Disposition of Claims		
4)⊠ Claim(s) <u>1-25</u> is/are pending in the application	n.	
4a) Of the above claim(s) is/are withdra		
5) Claim(s) is/are allowed.		
6) Claim(s) is/are rejected.		
7) Claim(s) is/are objected to.		
8) Claim(s) <u>1-25</u> are subject to restriction and/or	election requirement.	
Application Papers		
9) The specification is objected to by the Examin	er.	
10) ☐ The drawing(s) filed on is/are: a) ☐ ac		ne Examiner.
Applicant may not request that any objection to the	e drawing(s) be held in abeyance.	See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correct	ction is required if the drawing(s) is	objected to. See 37 CFR 1.121(d).
11)☐ The oath or declaration is objected to by the E	xaminer. Note the attached Off	ice Action or form PTO-152.
Priority under 35 U.S.C. § 119		•
12) Acknowledgment is made of a claim for foreig	n priority under 35 U.S.C. § 119)(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:	,,	
1. Certified copies of the priority documen	its have been received.	
2. Certified copies of the priority documen	nts have been received in Applic	cation No
3. Copies of the certified copies of the price	ority documents have been rece	eived in this National Stage
application from the International Burea		
* See the attached detailed Office action for a lis	t of the certified copies not rece	ived.

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 5-9, drawn to an adapter, classified in class 320, subclass 107.
 - II. Claims 10-14, 15-19, 20-25, drawn to a hybrid power supply, classified in class 429, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05©). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires a member including appropriate mating fitting that is not required in the combination. The subcombination has separate utility such as in combination with a battery charger.
- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/616,495 Page 3

Art Unit: 1745

4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

- 5. This application contains claims directed to the following patentably distinct species:
- Ia. Claims 1-4, drawn to an adapter that does not require a second a second member having electronics to convert power incident at an input of the adapter to an output power level at a pair of spaced battery terminals of the member; and a first pair of wires coupled between an input of the first member and output of the second member; and a second pair of wires coupled from an input of the second member to an electronic plug.
- **Ib.** Claims 5-9, drawn to an adapter that requires a second a second member having electronics to convert power incident at an input of the adapter to an output power level at a pair of spaced battery terminals of the member; and a first pair of wires coupled between an input of the first member and output of the second member; and a second pair of wires coupled from an input of the second member to an electronic plug.
- IIa. Claims 10-14, drawn to a hybrid power supply that does not require a fuel cell current sensor/comparator, and a feedback control loop disposed in the DC/DC converter.
- IIb. Claim 15-19, drawn to a hybrid power supply that requires a fuel cell current sensor/comparator, and a feedback control loop disposed in the DC/DC converter.

Application/Control Number: 10/616,495

Art Unit: 1745

IIc. Claim 20-25, drawn to a requires a DC/DC boost type converter as opposed to a switching type DC/DC boost type converter, nor does it require a fuel cell current sensor/comparator, and a feedback control loop disposed in the DC/DC converter.

The species are independent or distinct because each are directed toward distinct and independent mechanical means.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

Art Unit: 1745

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas H. Parsons whose telephone number is (571) 272-1290. The examiner can normally be reached on M-F (7:00-4:30) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pat Ryan can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
